PUTRA ANANTA DARMAWAN

Jl. Ki Hajar Dewantara, Mekarmukti, Kec. Cikarang Utara, Kabupaten Bekasi, Jawa Barat 17530,
+628121002827, putraananta404303@gmail.com

Date of birth	18 Feb, 2006	Nationality	Indonesian
Place of birth	Tulang Bawang	Driving License	SIM C

Profile

A highly adaptable and reliable individual with excellent time management skills. Responsible, diligent, and quick to learn new things, I thrive in dynamic environments and can easily adapt to various situations. My strength lies in mastering tasks with precision and dedication. However, I work best when focusing on one task at a time.

Education

Sep 2023 - Aug 2026 — Computer Science, President University — Cikarang
GPA 3.76/4.00

July, 2020 – May, 2023 — **IPA**, SMA Kebangsaan — Lampung Selatan

Aug 2017 - Aug 2020 — SMP N 01 Banjar Agung — Tulang Bawang

Experience

Oct 2023 - May 2024 — Multi Media & Design Project, PEEK ROOM Public Speaking & Student Consultation Program (President University) — WFO Cikarang
- Improved students' public speaking skills and confidence
- Provided one-on-one consultations based on student needs
- Aimed to support internship and job preparation

April 2025 - May 2025 — Internship Cyber Security Analyst, Tomorrow AI — WFH Canada
- Developed a custom web scraper to automate data collection for threat intelligence and analysis
- Conducted radio frequency (RF) analysis to identify and assess potential vulnerabilities in wireless communications
- Enhanced technical skills in information gathering, automation, and cybersecurity tools
- Gained practical experience in analyzing digital and physical security threats

Nov 2025 - May 2026 — Internship Production Planning Control PT Supernova Flexible Packaging (IT Project) — WFO Cikarang
- Developed and implemented an AI-powered WhatsApp Chatbot using n8n integration with spreadsheets to automate data processing and reporting, significantly reducing manual administrative work.
- Designed and tested Chatbot workflows to automate delivery confirmations, database updates, and data request responses.
- Converted delivery confirmation data from shared files into structured spreadsheets to support production and logistics tracking.
- Processed daily operational data using Microsoft Excel and Google Sheets to ensure accuracy for production and delivery planning.
- Coordinated with internal departments to confirm shipment schedules and resolve delivery-related issues.

May 2026 - Oct 2026 — Internship Production Planning Control PT Supernova Flexible Packaging — WFO Cikarang
- Managed the full Purchase Requisition (PR) lifecycle in SAP ERP to optimize raw material inventory levels.
- Cross-referenced Material Usage Documents (SPB) with Order Confirmations (OC) to guarantee accurate production floor data.
- Processed Cylinder Manufacturing Confirmations (KPC) and monitored daily machine outputs to evaluate production targets.
- Standardized master data (item codes) across Ancol, Jababeka, and MM2100 facilities, minimizing cross-departmental bottlenecks.

Project

Web — Leafy — Project Management System (Capstone Project) — Campus Project

- Engineered the Node.js/Express backend (81 REST endpoints, 17 controllers) with JWT authentication, bcrypt password hashing (cost 10), and Role-Based Access Control middleware for 5 user roles (Project Manager, Planner, Cost Engineer, Site Engineer, Management).
- Built a deterministic Planning Readiness engine (16 validation rules) and a server-guarded baseline-locking workflow to freeze project plans before execution tracking.
- Integrated Supabase PostgreSQL across 16 relational tables using server-side service-role credentials, with an audit-logging system tracking sensitive actions (create/update/delete/login/lock) by actor and IP.
- Authored 18 automated tests (Node.js test runner) validating readiness logic and performance (1,000-task dataset under 300ms p95), then deployed the API to Vercel.

Android — Flutter Cashier/Point of Sale Application with Local Database — Personal Project

- Developed a comprehensive mobile POS application using Flutter for inventory and sales record management.
- Utilized SQLite (sqflite) for robust local database management, implementing full CRUD (Create, Read, Update, Delete) for inventory (barang).
- Engineered a transaction module to select items, handle custom nominals, calculate totals, manage stock deduction, and process various payment methods (Cash, Transfer, QRIS).
- Implemented a reporting module to view and filter historical transactions by date and calculate the daily total revenue.

Web — Risk Management Web Application (Python Flask) — Campus Project

- Developed a secure, multi-module Risk Management system using Python Flask for the core framework.
- Implemented user authentication using Flask-Login and password hashing via Werkzeug for security.
- Managed data persistence using SQLite and Flask-SQLAlchemy, implementing full CRUD functionality for risk entries while ensuring user data ownership.
- Designed a Dashboard that analyzes and visualizes risk distribution (Status and Impact) using Chart.js.

Android Apps — Face Recognition-Based Android Attendance Application — Personal Project

- Developed a secure Android attendance application using Flutter for the UI.
- Integrated TensorFlow Lite (TFLite) to perform fast, on-device, real-time Face Recognition inference for user verification.
- Utilized Supabase as the Backend as a Service for secure storage of user data and attendance logs.
- Architected and developed a comprehensive HRIS attendance system using the Flutter framework, following a highly modular structure (features, providers, services).
- Implemented dedicated face recognition service for biometric processing and confirmed data persistence using Supabase through a dedicated service layer.
- Designed features around two distinct user roles (Employee and Admin), including dedicated screens for Attendance Recap, Face Registration, and Schedule Settings.

Skills

- Microsoft Excel (IF, VLOOKUP, COUNTIF, SUMIF, AVERAGEIF, Pivot Tables)
- Microsoft Office Suite (Word, PowerPoint, Outlook)
- Web Development Proficient in HTML, CSS, and JavaScript, react, web tools and frameworks.
- Android Studio and integrating additional libraries, including Firebase.
- Applying AI in Android applications
- Backend Development in Python, PHP, Node.js, dart, Java
- Server architecture and data exploitation techniques.
- Google Dorking for information gathering and reconnaissance.
- Ethical hacking and penetration testing methodologies.
- n8n workflow
- DevOps & Database Docker, Containerization, SQLite, Supabase, MySQL, PostgreSQL
